Cost Saving Installations

We love seeing Raypak products in the field and in new installs and are constantly curious as to why these partners choose Raypak for various projects and installation projects. We sat down and chatted with FourMation Sales, who represent the top product lines for the plumbing, heating and mechanical industries in Minnesota, MN, Wisconsin, WI, North Dakota, South Dakota and Michigan. We learned more about why they continue to choose Raypak when working on new projects.

PROJECT #1

Mixed Use Apartments

Minneapolis, MN

These Raypak XTherm Waters Heater Boiler & Raypak Storage Tanks serve a 12 Story 266 Unit Minneapolis Mixed Use. With that many units and occupants it's no wonder why Wenzel Plumbing chose Raypak's Boiler Water Heaters. This project will produce a whopping 6,220 gallons first hour rating at 80F rise or 103 GPM.

- (2) 2,000,000 BTU Raypak XTherm Water Heaters
- (2) 335 Gallon Storage Tanks.

PROJECT #2

Mixed Use Apartments

Minneapolis, MN

Great installation by Wenzel Plumbing & Heating these (2) 1,500,000 BTU XTherm Water Heaters with (2) Insulated 500 Gallon Storage Tanks provide enough hot water for this 22 story 340 unit apartment building. FourMation Sales assisted with project design and boiler commissioning which consisted of programming and combustion analysis.

- (2) WH7-1505 XTherm Condensing Water Heaters 1,500,000 BTU
- (2) Insulated 500 Gallon Storage Tanks

“

As it is the XTherm Water Heater Boilers are great for high volume domestic water heating. Plumbers love them as all components on the 2 million BTU and lower are included in the equipment which means not having to pipe external to the unit and is a huge labor saver. We like them due to the simplicity of start-up, programming, and controls.
